Our Building Blocks

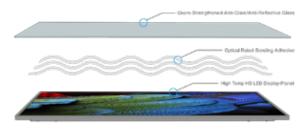

LCD OPTIONS

We have LCD displays ranging in all sizes from compact 10.1" displays, to premium, 23.8" 4K displays, and everything in between. When part numbering, a 17.3" wide LCD display would be represented as '173W'. A 23.8" 4K LCD display would represented as 238U. For a full list of our available displays, please see our LCD Matrix Guide. Please note that we specialize in customizing display solutions, so do not hesitate to inquire about screen options or sizes which are not currently listed in our guide.

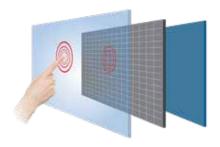

AD Controller

We offer a variety of Analog-Digital Controller Boards. The board you choose will depend on the specific features and inputs you require for your application. Each board features particular input options, varying from HDMI to S-Video to 6G-SDI. Boards vary in price, with some providing simple display features, while others offer sophisticated broadcasting tools, like Wave Form Monitor and Vector Scope. For a detailed look at our AD Controller Board offerings, please see our AD Controller Card Matrix.

Optical Bonding

Optical Bonding refers to the material bonded between the panel and the outer protective glass. Optically bonding a display enhances its readability in difficult viewing environments. When a normal display is used in these difficult settings, some factors affect its readability. The most common factor is "fog", or condensation, which forms on the inner surface of display's vandal shield. Another common factor is the reflection of sunlight, which causes a mirror-image on the display. Both phenomena can be solved by optically bonding your display.

PCAP Touch

PCAP (Projected Capacitive) Touch Screens work through the use of a conductive grid that recognizes changes in its electromagnetic field via the touch of your finger. PCAP is regarded as the superior touch screen technology. Unlike Infrared technologies, which have a very limited array, PCAP technology is significantly more accurate, and is the preferred technology for smart phones and tablets. Virtually every monitor we offer at DITHD can be upgraded to PCAP touch.

High Brightness

Screen Brightness is an important consideration for particular environments, such as an outdoor display solution. Standard panels are designed for indoor-viewing, and are thus designed to operate effectively at a much lower brightness of about 250 to 400 NITS. (NITS are a measurement of luminance, or the intensity of visible light.) However, when a standard-brightness monitor is viewed outdoors, or in other bright environments, the visibility drops drastically. This is due to the lower brightness of the display being unable to compete with brighter light sources. The solution is a simple upgrade to a high bright version of most of our existing panel sizes, which often increase panel brightness to over 1000 NITS.

MMR-Quantum

Entry-Level Rugged Mobile Monitor

Rugged Carrying Hande

Storm Case (Included) Kickstand (Included)

Optional Battery Cradle With IDX V-Mount **Anton Bauer Gold Mount**

Features:

- **Entry-Level MMR Option**
- V33x Quantum Controller Card
- Screen Sizes: 101W, 121W, 156W. 173W. 215W
- **All-Aluminium Construction**
- **Splash/Dust Proof Port Covers**
- **Rugged Carrying Handle**
- Customizable, Modular Design
- **Built-In Speakers (On Models** 156W & Larger)
- **Built-in Kickstand**
- **Optional Battery Cradle**
- **Optional HighBright**
- **Optional PCAP Touch**
- **Optional Optical Bonding**

MMR-Dionysus

Professional-Grade Rugged Mobile Monitor

Features:

- · Top-Of-The-Line MMR Option
- V44x Dionysus Controller Card
- 3G SDI
- Vectorscope, Waveform, and Histogram Ready
- · Wireless Transmit/Receive
- · Broadcast-Quality LCDs
- Screen Sizes: 101W, 156W, 121W, 173W, 215W
- 1/4" Headphone Jack
- All-Aluminium Construction
- Splash/Dust Proof Port Covers
- Rugged Carrying Handle
- Customizable, Modular Design
- Built-In Speakers (On Models 156W & Larger)
- · Built-In Kickstand

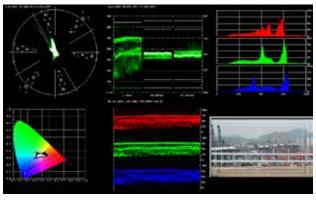

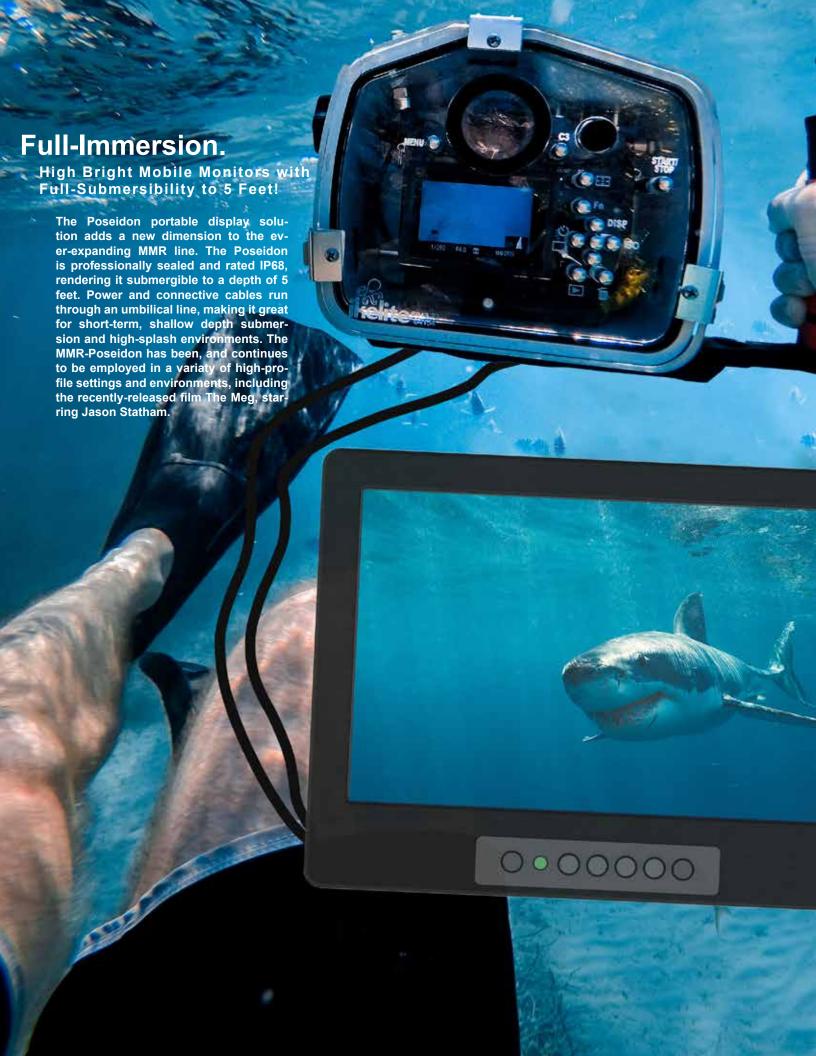

Professional Scopes

Perfect Signal with Waveform, Vectorscope, and Histogram!

Never muddle a shot again! The MMR-D's professional Vectorscope will guide your color correction, while its Waveform technology perfects lumination. The scopes can be viewed either in Fullscreen Mode, or as an Overlay superimposed onto the screen. Know if you are crushing the blacks in that night shot, or clipping the whites in those clouds with DITHD's Professional Scopes, available on our high-end MMR's.

MMR-Poseidon

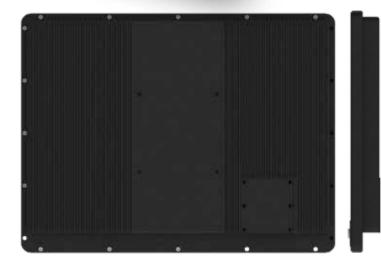

Water-Submersible Rugged Mobile Monitor

Features:

- Elite, Water-Proof Monitor Solution
- V257x Poseidon Controller Card
- · Screen Sizes: 121HB, 173HB
- Milled-Aluminium Construction
- · Sealed, Splash and Dust Chassis
- Customizable, Modular Design
- Comes standard with High Bright

 Panels
- Optional Battery Cradle
- Optional PCAP Touch
- Optional Optical Bonding

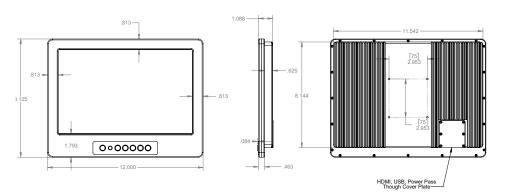

MMR-SCxx

Storm Case Design w/ Single or Multi-Head **Monitor Configurations.**

Features:

- Splash-Proof UK or Pelican Storm Case
- Single Monitor Compatible With Any Controller Card
- Single Monitor Screen Sizes: 156W, 173W,
- **DITHD's Most Customizable Product Line**
- **Rugged Carrying Handle**
- **Optional Battery Cradle**
- **Optional HighBright**
- **Optional PCAP Touch**
- **Optional Optical Bonding**

3G SDI

HYDRA Features:

- MMR-SCxx HYDRA Available in Double or Triple Screen Configurations
- Multi-Monitor Compatible With Any HYDRA Series DITHD **Controller Card**
- Triple Monitor Screen Sizes: 173W, 215W
- **Available 4K Panels**

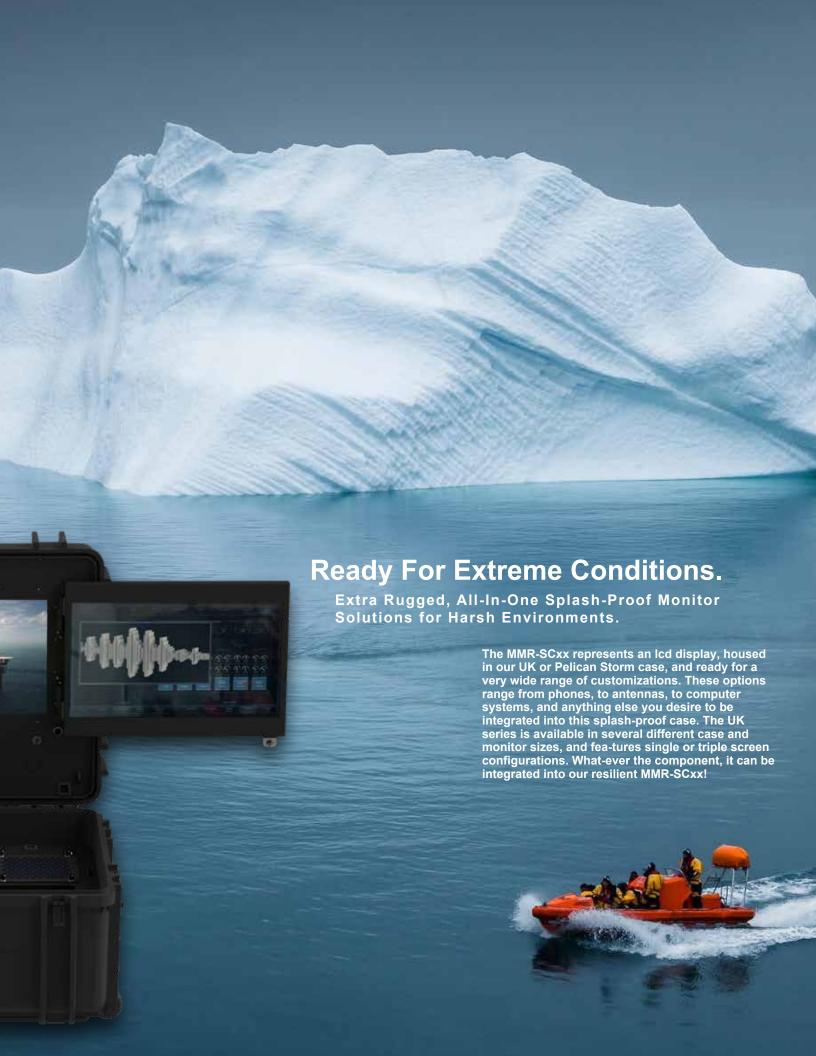

(Example Configurations)

三京園!

MMR-Ultra

Professional-Grade, 4K Multi-Display Mobile Monitor

Features:

- Top-Of-The-Line MMR Option
- Available in 1, 2, or 3 Screen Configurations
- V40x Controller, PIP, PBP, Quadview
- 12G SDI
- 4K, Broadcast-Quality LCDs
- Screen Sizes: 173U, 238U
- 1/4" Headphone Jack
- All-Aluminium Construction
- Splash/Dust Proof Port Covers
- Rugged Carrying Handle
- Customizable, Modular Design
- Built-In Speakers (On Models 156W & Larger)
- Built-In Kickstand
